

President's Message

2024

It seems that as soon as one election cycle ends another one begins. Already the 2024 Presidential, State, and local election candidates are voicing their candidacies either exploratory or as an actual declaration of intent to run. The Grand Republicans will not endorse any candidates prior to the primary elections. Any candidate wishing to address our organization prior to the primaries is free to do so. However, once the primaries are completed, we will support the candidates winning their primaries.

The past versus the future

The 2020 presidential election was more than two years ago. The 2022 election was five months ago. While it is important to make sure the errors of the past are corrected, we cannot lose sight of the future. The 2024 elections are critical, and we must do everything in our power to ensure a Republican win. Dwelling in the past to the exclusion of the future will condemn us to another Democrat win, which this nation cannot afford. We see what President Biden has done in two years in office. Can you imagine the damage he could cause if allowed four more years in office?

Already the administration has taken us from an energy independent nation to a nation dependent on other countries for some of our energy supplies. They want to restrict if not outlaw gas stoves, gas heaters and gas clothing dryers.

What about the close to six million illegal aliens now within our borders? Seems the sanctuary cities like New York and Chicago are rethinking their status. The mayor of New York is sending illegals out of the city. A group of homeless American veterans was removed from a hotel to make room for illegals. Where does it end?

So, while it is important that the past irregularities in voting be corrected, it is vital that we also concentrate on the next election. To not do so will condemn us to another four years of Democrat control and our country cannot survive such an outcome.

I repeat: The past cannot let us forget the future. The future is too important to us, our children, our grandchildren, and our great grandchildren. So, we need to work on parallel courses, work on the past but also concentrate on the future.
